Neurodevelopmental Care

Special Interest Group

Our focus is advocating for the promotion and consistent implementation of evidence-based neuroprotective **infant and family-centred developmental care [IFCDC]** practices across neonatal settings. IFCDC has an essential role in **optimising long-term neurodevelopmental outcomes** and in the emotional well-being of preterm, sick and vulnerable neonates and their families.

Altimier & Phillips; The Neonatal Integrative Developmental Care Model: Advanced Clinical Applications of the Seven Core Measures for Neuroprotective Family-centered Developmental Care

Our aim

Promote individualised and consistent evidence-based neuroprotective practice in IFCDC for preterm, sick and vulnerable neonates across neonatal settings with a focus on the following core measures of Neuroprotective Family-Centred Developmental Care:

- Healing environment
- Partnering with families
- Minimizing stress and pain
- Positioning and handling
- Safeguarding sleep
